### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 01 February 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### DETAILED ACTION

The last office action is hereby withdrawn in view of Applicant's arguments. However, a new ground of rejection is cited herein based on a further review the IDS submitted in 371 case.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Leong (5,194,581).

The reference discloses a composition useful as prostheses and as therapeutic agent delivery vehicles, comprises a biodegradable, biocompatible class of poly(phosphoesters) which has the general formula (see col. 4, line 6 et seq.) in that if  $R' = -(CH_2)_n-$ , read on the claimed R1 in the claimed formula, n is from about 10 to about 100,000; and R group can be a therapeutic agent, or  $-NH-R1$  in that R1 is nitro, amino, - (see col. 5, lines 5-17) then the general formula is read on that of the claimed formula.

Note that the claimed biodegradability can be achieved by varying the functional groups R or R' (See col. 6, lines 10-14), which comprises drugs, radioisotopes, immunomodulators, lectins---(see col. 6, line 29 onto col. 8, line 8).

The disclosure of the reference differs from the instant claims in that it does not disclose the claimed characteristics such as water soluble and positively charged---

However, the reference does disclose the claimed  $R = -NH-R_1$  in that  $R_1$  is nitro or amino group, corresponding to  $R_3$  component in claim 3 whereas  $R_2$  is hydrogen; and  $R'$  group in the reference is  $-(CH_2)_a-$ , corresponding to the claimed  $R_1$  with formula II. In view of this similarity, it would appear to be inherent that the claimed characteristics, water soluble and positively charged biodegradable polyphosphoramidate must be considered inherent in the prior art. See *In re Best*, 195 USPQ 430, 433 (CCPA 1977).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc Truong whose telephone number is 571-272-1081. The examiner can normally be reached on Monday-Friday.
